

Non superuser test

Normal user goes the .../dashboard/sitemanager/. Feedback is given that that is not allowed, since user is not a superuser.

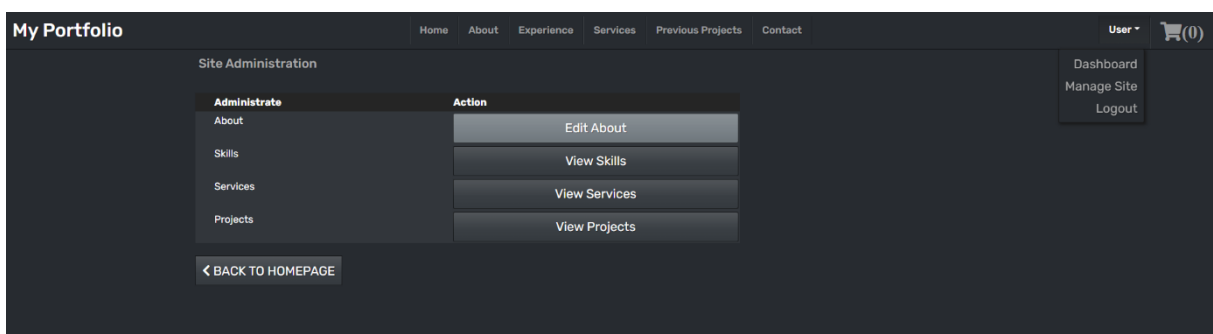

Edit about test

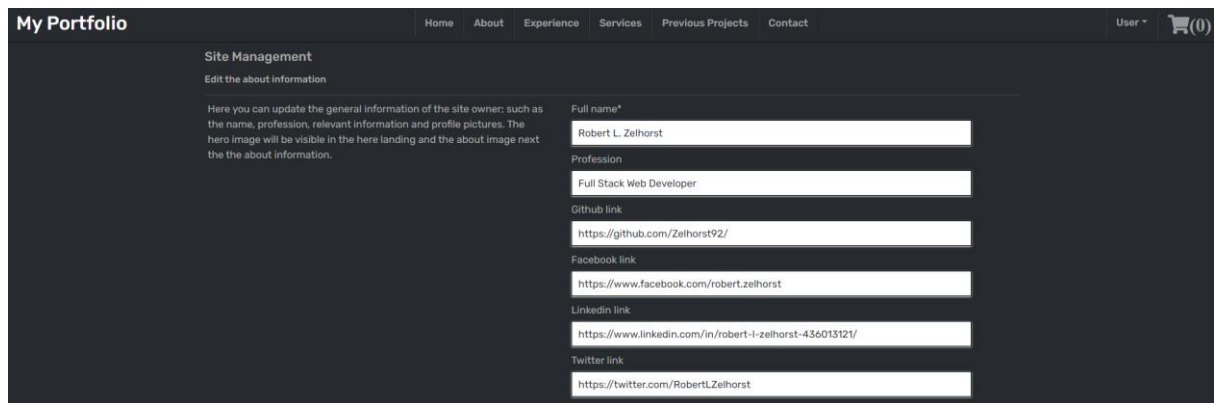

Unchanged landing.

Siteowner/superuser goes to the adminpanel.

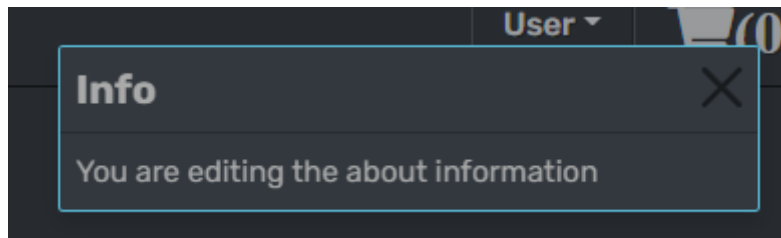

Edits about form, already filled in with current information.

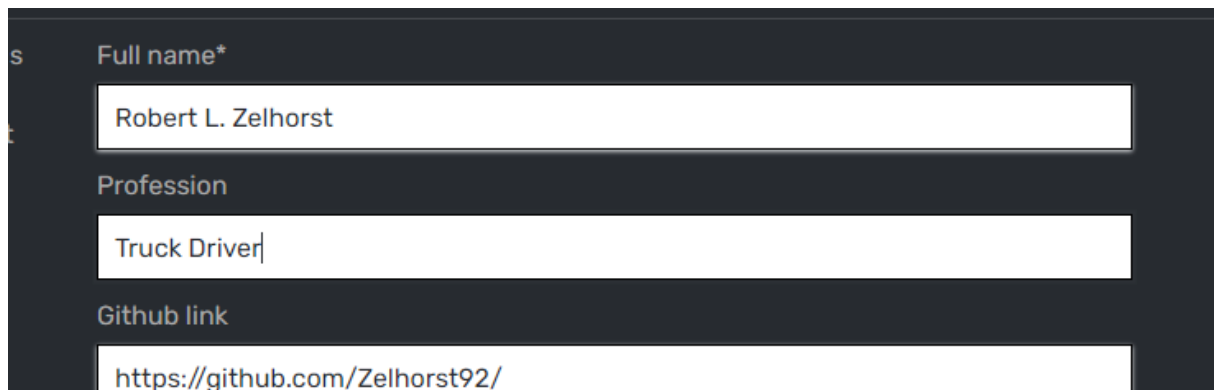

The screenshot shows a web application titled "My Portfolio" with a navigation bar containing links: Home, About, Experience, Services, Previous Projects, and Contact. A user profile dropdown and a shopping cart icon with "(0)" are on the right. The main content area is titled "Site Management" and "Edit the about information". It includes a text block explaining that users can update general information like name, profession, and profile pictures. To the right is a form with the following fields:

- Full name*: Robert L. Zelhorst
- Profession: Full Stack Web Developer
- Github link: <https://github.com/Zelhorst92/>
- Facebook link: <https://www.facebook.com/robert.zelhorst>
- Linkedin link: <https://www.linkedin.com/in/robert-l-zelhorst-436013121/>
- Twitter link: <https://twitter.com/RobertLZelhorst>

Feedback is given that the superuser is now editing the about information.

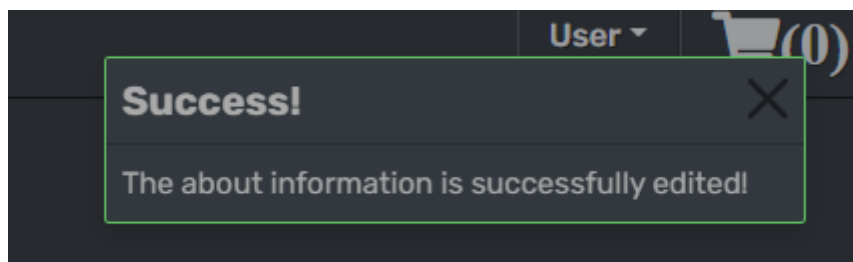

Superuser inputs new profesion and updates about information.

This screenshot shows the same "Edit the about information" form as before, but with updated data. The "Profession" field now contains "Truck Driver". The other fields remain unchanged:

- Full name*: Robert L. Zelhorst
- Profession: Truck Driver
- Github link: <https://github.com/Zelhorst92/>

Superuser gets feedback that editing was successful.

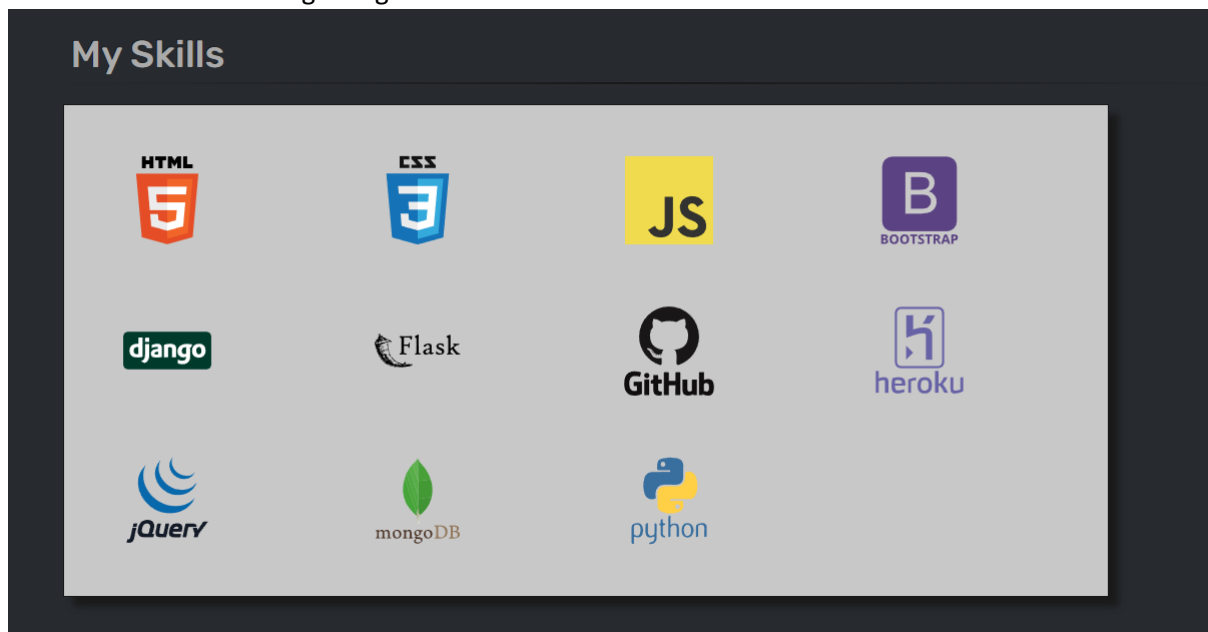

About information has been changed.

Change skill test

Number of skill in the beginning.

Superuser goes to the overview of skills form the admin panel.

Skills List

Add a skill

Here you can add a skill/competency. The name is required. If you submit without an image and image URL, it will default to no-image. If both provided, it will default to the image.

Update Skill

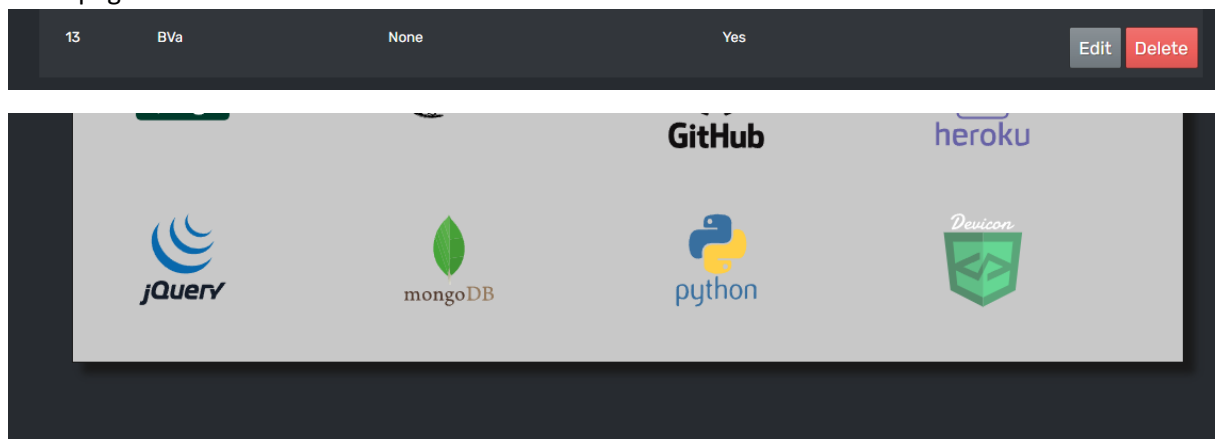

Superuser adds the devicon skill with url and a dummy skill with no image and no img url. They are now both on the list and on the landing page. The dummy has the default noimage.png.

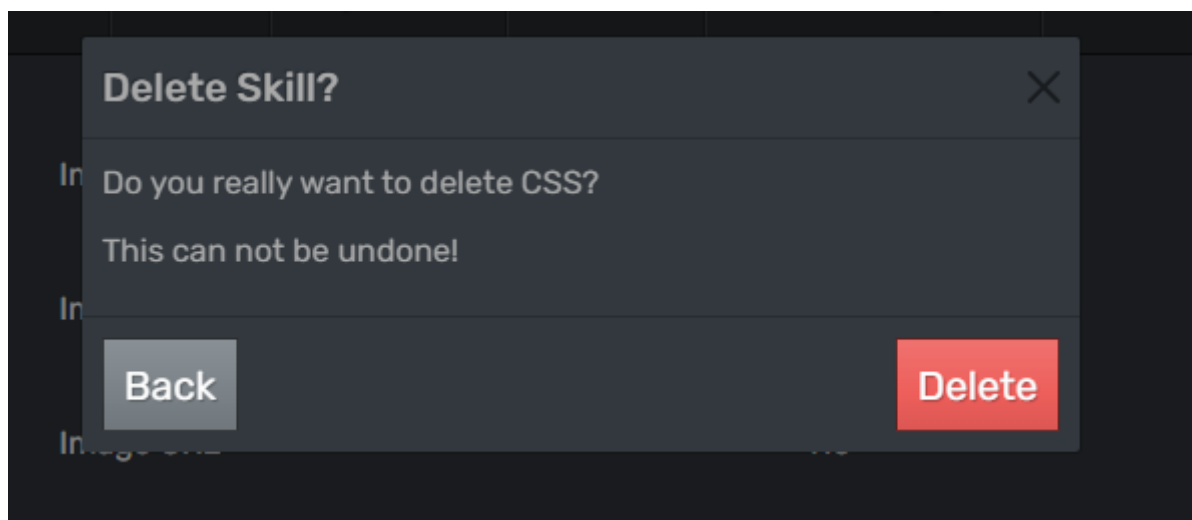

Superuser edits the dummy skill and gets feedback that the dummy is being edited.

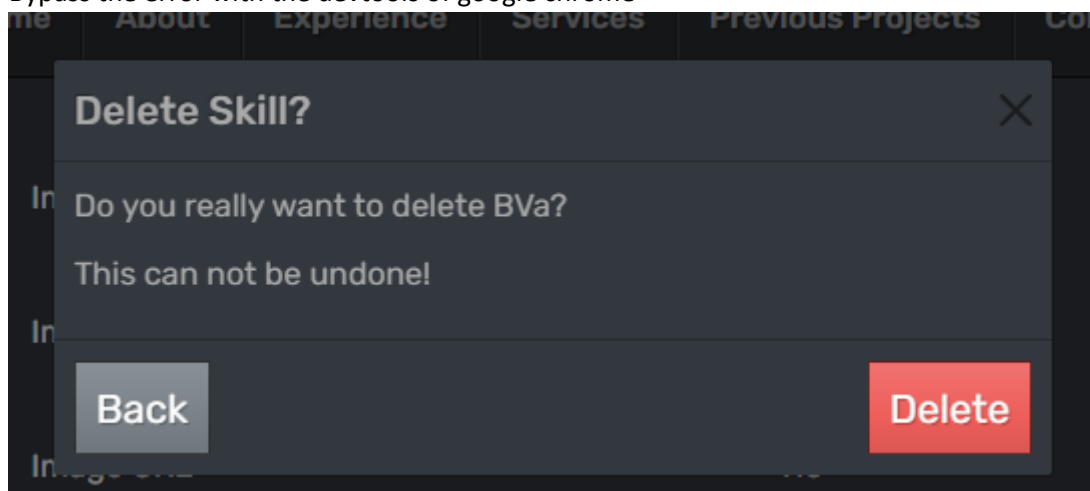

Dummy skill is on the list and shows as hidden (hidden = yes). It is no longer present on the homepage.

Superuser wants to delete the dummy skill. An error occurs. While clicking on the delete button of the dummy skill, it asks if the superuser wants to delete the CSS skill. This is an error in the modal. See bugreport: wrongmodal.

Bypass the error with the devtools of google chrome

The superuser deletes the dummy skill and gets feedback for a successful deletion. The dummy skill is no longer on the list and not on the landing page.
